

ACC RAC 2018 CONFERENCE SCHEDULE

InterContinental Dallas, Dallas, TX

Competencies and Collaboration

Continuing education credits will be available for most sessions. Doctors of Chiropractic may earn up to 14 continuing education hours pending your state board's approval. Continuing education credits are provided through Palmer College of Chiropractic.

Thursday, March 8

8:00 am - 5:00 pm

ACC Working Group Meetings (closed meetings for ACC working groups)

Presidents – The Colonnade
Admissions/Enrollment – Crystal Ballroom II
Assessment and Accreditation – Crystal Ballroom VI
Chief Academic Officers – Crystal Ballroom VII
Chief Financial Officers – Laliq Ballroom II
Clinic Directors – Crystal Ballroom VIII
Institutional Advancement/Development – The Waterford A
Librarians – Crystal Ballroom I
Post Graduate – The Baccarat
Research Directors – Laliq Ballroom I
Student Affairs – The Waterford B

6:00 pm - 7:30 pm – Crystal Ballroom Foyer

Welcome Reception - *Sponsored by Standard Process, Inc.*

All attendees are invited to join

Friday, March 9

7:00 am - 8:00 am – Crystal Ballroom Foyer

Continental Breakfast

8:00 am - 8:10 a.m. – Crystal Ballroom I - V

Opening Plenary Session

Opening of the ACC RAC 2017 Conference – Introductions and Welcome
Michael Cioffi, DC – Dean, University of Bridgeport, College of Chiropractic
(ACC Vice-Chair)

8:10 am - 8:50 am – Crystal Ballroom I - V

Competencies and Collaboration

A Report from the Eastern Front: What Lies Ahead for Private Higher Education?

Keynote Speaker: David Warren, PhD
President, National Association of Independent Colleges and Universities

Dr. Warren is one of the most widely respected leaders in higher education. He has lead NAICU for a quarter century through the changing educational environments and championed student as well as institutional interests.

Dr. Warren will update attendees on the latest congressional legislation and regulations effecting students and education.

Transforming Health Care by Exploring New Models of Collaboration

Keynote Speaker: Tracy Gaudet, MD
Veterans Administration, Office of Patient Centered Care and Cultural Transformation

Dr. Gaudet is a transformational leader in health care. She is an advocate for integrating collaborative efforts within the VA health care system with remarkable success.

Learn about the recent initiatives that are changing team health care for patients.

8:55 am - 9:55 am – Crystal Ballroom I - V

Advancing Patient Safety Research through Collaborations

This diverse panel of speakers passionate about patient safety will share best practices from their experience. In particular, organizational culture conducive to the development of patient safety innovations and the early adoption of patient safety values in teaching institutes will be explored. The panelist will conclude with a discussion on why patient safety needs to be directly addressed by self-regulated healthcare professions and how it can be done in the vast jurisdictions and practice settings that doctors of chiropractic are involved.

Moderator: Katherine Pohlman, DC, MS, DICCP - Clinician Research Scientist & Assistant Professor

Panelist: Thomas Diller, MD - Executive Director of UNTHSC's Institute for Patient Safety

Panelist: Kristian Poitier, RN , MBA, MHSM – Corp. Director of Patient Safety & Clinical Risk Mgmt, Tenet Healthcare Corp.

Panelist: Maeve O'Beirne, MD, PhD - Family Physician and Patient Safety Expert in Ambulatory Care Settings

Panelist: Silvano Mior, DC, PhD – Director of Research Partnerships and Health Policy CMCC, SafetyNET Investigator

Panelist: Stacie Salisbury, RN, PhD – Assistant Professor, SafetyNET Co-Investigator

10:00 am - 10:30 am – Crystal Ballroom Foyer

Break - Sponsored by Standard Process, Inc.

10:30 am - 12:00 pm

Workshops

Crystal Ballroom VI	Crystal Ballroom VII	Crystal Ballroom VIII	Lalique Ballroom I	Lalique Ballroom II
RESEARCH	EDUCATION	COLLABORATION	CLINICAL	ADMINISTRATION
<p>Improving Scientific Writing by Becoming a Better Peer-Reviewer</p> <p>It is ironic that in this time of evidence-based care the peer-review process remains largely opinion based. The purpose of this workshop is to make explicit for reviewers and authors what constitutes good, evidence-based reviewing. This will help current and prospective peer-reviewers achieve best practices in reviewing, and will provide clear benchmarks for authors to consider prior to submitting their manuscripts</p> <p><i>Stephen Perle Kent Stuber Brian Budgell</i></p>	<p>Talking the Talk – Evidence-Based Inter-Professional Communication</p> <p>Current trends in healthcare are moving toward interdisciplinary, patient-centered care. Faculty and practicing clinicians need to be able to model behaviors and communications to prepare students (and future colleagues) for multidisciplinary environments. One of the benefits of evidence-based clinical practice (EBCP) is that it creates a framework for inter-professional communication and collaboration. This workshop will build on the foundations of EBCP exploring the research base and developing talking points that are supportable.</p> <p><i>John Stites Barbara Mansholt Shawn Neff</i></p>	<p>Cultural Competency in the Academic Clinical Setting</p> <p>The chiropractic profession currently serves diverse patient populations across the United States and around the world. Because of this, and because of need to expand chiropractic utilization into new populations, it is imperative that DC students receive training and mentoring in cultural competency. Further, a critical part of this training process involves both faculty and institutions serving as role models of cultural awareness, cultural knowledge and cultural skill. While cultural competence is an expectation of professional and accreditation standards, fundamentally, the leadership of an institution must embrace cultural competency as a core values.</p> <p><i>Karen Bobak Lisa Bloom Kristina Petrocco-Napuli</i></p>	<p>Addressing the biopsychosocial influence on pain in clinical practice</p> <p>The objective of this workshop is to provide an overview of the biopsychosocial model of pain and introduce strategies for the chiropractic clinician to incorporate into a patient management plan. Recognition strategies, optimal patient-doctor communication, and active patient self-care approaches will comprise the tenets of this workshop curriculum.</p> <p><i>Jordan Gliedt Jeff King Michael Schneider</i></p>	<p>Enhanced Teacher Education through implementation of hybrid/online Faculty Development workshops</p> <p>This workshop will discuss different strategies for faculty development at different chiropractic institutions. In particular, the steps in creating and refining a faculty development program, as well as some of the successes and challenges will be discussed. Two different strategies for faculty development will be presented. The first is the hybrid delivery format of CMCC's Teacher Education Program and Faculty Development programs. The second is a model based on Diffusion of Innovation. Attendees will learn how to identify faculty resistance and how to implement changes, leading to increased adoption and higher quality.</p> <p><i>Scott Dunham Eric Russell Dana Lawrence</i></p>

12:00 pm - 1:30 pm – Crystal Ballroom I - V

Lunch - Sponsored by NCMIC Insurance Company

Announcement of the Jerry McAndrews Award

1:30 pm - 3:00 pm

Scientific Contributed Platform Sessions

5:00 pm - 6:00 pm – Crystal Ballroom Foyer

Reception and Scientific Contributed Poster Presentations *Sponsored by ChiroTouch*

Meet and mingle with other scientific researchers, educators, clinical practitioners and leaders in the profession. All attendees invited to attend the poster presentation reception.

Listed in alphabetical order (last name of first author).

The chiropractic care of a patient presenting with rib pain syndrome

Joel Alcantara, Junjoe Alcantara

Spinal manipulation and other complementary and alternative therapies for neck pain in the US

Peter Amua-Quarshie, Patricia Cates, Afsar Sokhansanj, Farshid Marzban, Richard Salazar, Harrison Ndetan

Preparation for US chiropractic medicine licensure by Doctor of Chiropractic educational programs

Christopher Arick, Sheyda Isazadeh

Post-traumatic SLAC of the wrist: a case review

Daniel Ault, David Mann, Alyssa Troutner, Norman Kettner

Sonography of Achilles tendon pathology: a case series

Patrick Battaglia, Ross Mattox, Daniel Ault, Norman Kettner

The ambiguity of sciatica as a clinical diagnosis and the value of integrating chiropractic care into a federally qualified health center

Patrick Battaglia, Barry Wiese

Vertebral displacement and muscle activity during manual therapy: distinct behaviors between spinal manipulation and mobilization

Eric Biner, Martin Descarreaux, Isabelle Page

A survey of sacro-occipital technique (SOT) practitioners: Pediatric patients and their presenting symptoms

Charles Blum, Thomas Bloink, Christine Benner

The polyvagal theory: A rationale for psychological and chiropractic interdisciplinary care

Charles Blum, Thomas Bloink

Sacroiliac joint hypermobility syndrome and a chiropractic: A preliminary survey

Charles Blum, Rachel Hamel

A preliminary survey of chiropractic college use of table sanitizers in their clinic: Are there green alternatives?

Charles Blum.

Study on inducing fifth lumbar vertebra malposition by M. B. DeJarnette: Historical development of sacro-occipital technique

Charles Blum, Rick Serola

Intervention in gall bladder dysfunction through chiropractic adjustment and nutritional therapy: a case report

William Boro, Mary Psaromatis

Intervention in tachycardia through chiropractic adjustment, sacro-occipital technique's chiropractic manipulative reflex technique: a case report

William Boro

EBCP curriculum development: An innovative and integrated approach

Theresa Brennan, Ali Rabatsky, William Sherrier

Patient-centered outcomes utilized in clinical pediatric manual therapy research studies

Beth Carleo, Carol Prevost, Brian Gleberzon, Kris Anderson, Katherine Pohlman

Chiropractic management of Fluoroquinolone allergic reaction

Tara Chevront, Adam Sergeant

Incidentally-found benign bone tumor leading to diagnosis of avascular necrosis in a patient with Crohn's disease: A case report

Munyeong Choi

Effects of high and low-power poses on maximal force production during a prone Carver thoracic adjustment performed on a mannequin atop force sensing table technology

Lydia Colacino, Richelle Martins, Jesse McAleese, Joseph Greenwood, David Starmer, Simon Wang

The Effects of Spinal Decompression on a Patient with a Post Traumatic Disc Injury

Karima Cooper

The Effect of Chiropractic Care and Retained Primary Reflex Therapy on a Patient with Erb's Palsy

Karima Cooper

Chiropractic management for female veterans with low back pain: A retrospective study of clinical outcomes

Kelsey Corcoran, Andrew Dunn, Lance Formolo, Gregory Beehler

Chiropractic management in a 54-year-old female with post-operative spinal adhesive arachnoiditis

Stacey Cornelson, Edward Johnnie, Norman Kettner

Large intramuscular hemangioma of the forearm: a case report

Stacey Cornelson, Jude Miller, Gary Guebert

A case report of osteomyelitis secondary to *Kingella kingae* in a 17-month old

Sophia Da Silva-Oolup, Julie O'Shaughnessy

Identifying the frequency of perinatal sacroiliac hypermobility indicators in a chiropractic clinic

John Edwards, Jeanne Ohm, Charles Blum

Performance of eyes-closed unipedal stance static balance test by pregnant women under chiropractic care

John Edwards, Allison Union, Joel Alcantara, Cassandra Varner

Survey attributes of chiropractic patients over 50 years of age

Kimary Farrar, John Ward

Management of an 11-year-old male with calcaneonavicular partial coalition in a chiropractic teaching clinic
Melissa Ferranti, Lindsay Fierman

Unilateral Internal Jugular Vein Discovered External to Carotid Sheath and Superficial to Omohyoid Muscle
Craig Fuller, Peter Amua-Quarshie, Bahram Sardarabadi, Susan Miller

Basic Science Education in Chiropractic Colleges
Craig Fuller, Georgina Pearson, Afsar Sokhansanj, Michael Perryman, Paula Robinson

Cervical postural syndrome: a case for classification
Courtney Goodchild, Nathan Hinkeldey

SOT cranial therapy with an occlusal splint for the treatment of low back, leg and neuropathic pain: A chiropractic dental co-treatment case report
Rachel Hamel

C2 spondylolysis: a case for collaborative care
Nathan Hinkeldey, Russell Reichter, James Leonard, Michelle Snow

Emergency department referral: a case for chiropractic integration
Nathan Hinkeldey, Britta Conlon

Perceived canine adjusting confidence of multidisciplinary professionals after experience in a simulation lab
Dana Hollandsworth, Gene Giggelman, Lori Baggett, Eric Russell

Effects of aromatherapy on test anxiety in students: A literature review
Karmen Hopkins, Breanne Wells

Research topics of interest to practicing chiropractors: a pilot study
Ronald Hosek, Stephanie Sullivan, Edward Owens, Angela Seckington

Traumatic lower cervical spondylolisthesis presenting comorbid with chronic rheumatoid arthritis in VA chiropractic clinic: a case report
Steven Huybrecht, Kyle Reynolds, Pamela Wakefield

Trends in the utilization of force sensing technology outside of the curriculum in open practice hours
Rebecca Kang, Tim Lau, Jae Hyun Cho, Omolola Ayoola-amale, Hera Khayyam, David Starmer

What the supercentenarians can teach us about aging well: a literature review with clinical pearls
Lisa Killinger

Developing and testing rubric inter-rater reliability for assessing Meta-competency 1 & 2 performance
Kathy Kinney, Rhina Patania, Linda Savage, Krista Ward

Health behaviors and beliefs of patients seeking acupuncture and chiropractic care
Anupama Kizhakkeveetil, Kevin Rose

Full thickness biceps tendon tear in a 46-year-old male emphasizing the value of musculoskeletal ultrasound
Ashley Lewandoski, Stacey Cornelson, Norman Kettner

Effect of chiropractic care on opioid dependence among patients with back and neck pain
Melissa Lo, Wade Bannister, Laura Ten Eyck

Making National Library of Medicine Classification local: An expansion for chiropractic specific library collections
Katie Lockwood

Developing a formal tutoring program at a chiropractic institution
Ashley Long

Chiropractic role in management of an infant with VACTERL Association: A case report
David Mann

Resolution of EMG confirmed lumbosacral radiculopathy with chiropractic care
Barbara Mansholt

Re-Evaluation of Intra- and Inter-Examiner Reliability of Leg Length Analysis procedure in Prone position among experienced practitioners
Farshid Marzban, Marty Hall, ASteven Kleinfeld, Charlotte Watts, Ronald Wells, Afsar Sokhansank, Harrison Ndetan

A case report highlighting pitfalls of clinical examination and imaging in the diagnosis of intramuscular myxoma
Ross Mattox, Patrick Battaglia, Norman Kettner

Resolution of medial femoral cutaneous nerve entrapment using manual therapy and end range loading: a case report
Trevor McArthur, Nathan Hinkeldey, H. Michael Olson, Laurie Hinrichs

Dizziness in a patient with airway compromise and TMD: A case report
Jeffrey Mersky, Charles Blum

Exploring Chiropractic Services in the Canadian Forces Health Services—Opportunities and Challenges
Silvano Mior, Ellen Vogel, Simon French, Margareta Nordin, Patrick Loisel, Audrey Laporte, Debbie Sutton

Learning spinal manipulation: gender and experience differences in biomechanical parameters, precision and variability
Megane Pasquier, Florian Barbier Cazorla, Yannick Audo, Martin Descarreaux, Arnaud Lardon

How well does chiropractic education prepare for practice – a comparison of perceived preparedness of European chiropractic graduates: a cross-sectional study
Elina Pulkkinen Pablo Perez de la Ossa

Use of a class 4 laser in recalcitrant elbow tendinopathy: a case study and brief review of the literature
Mark Pfefer, Brian Asbury, Rachel Gilmore, Jackson Berg, Dani Steffen, Nathan Hoover

Implementation of a Multisource Feedback System in a College of Chiropractic
Daniel Ranz, Rodney Pendarvis, Pablo Perez de la Ossa, Pablo, Elina Pulkkinen, Adrian Wenban

The Double Notch Sign: Osteochondral fracture strongly indicating severe internal joint derangement: A case report
Matthew Richardson, Lauren Sullivan

Concussion risk reduction among high school football players wearing protective external helmet technology: an observational study
Robert Rowell, Steve Novicky

Analysis of kinematic variability in pianists: a pilot study
Anne-Marie Schmidt, Brent Russell, Ronald Hosek

Sensory integration therapy utilizing the SAVE Program: A case report of a post-concussive adult
Angela Seckington, Stephanie Sullivan, Emily Drake

Exploring the relationship of GPA and performance on a digital test of radiology interpretation skills (DIM) in chiropractic colleges

Margaret Seron, Paul Townsend, John Hyland, Igor Himelfarb, Michele Fisher

The benefits of acupuncture to the management of capsulitis (TMD): a case study

Peter Shipka, Brian Gushaty, Kostadinos Kakarelis, Peter Semeniuk

Utilization of acupuncture for the management of neuropathy related to Frieberg's Disease: a case study

Peter Shipka, Brian Gushaty, Aaron Teitelbaum, Peter Semeniuk

Dental chiropractic non-surgical interdisciplinary care of a 48-year-old male patient with a deviated septum, headaches, and TMJ dysfunction: A case report

David Shirazi, Adam Del Torto, Charles Blum

Vaginal birth after Caesarean (VBAC) with twin pregnancies under chiropractic care with Network Spinal Analysis

Melody Spear, Joel Alcantara

Evidence-based practice attitudes and utilization survey (EBASE) of chiropractic students

Sarah Stephens, Joel Alcantara

Survey of chiropractic clinicians on self-reported knowledge and recognition of mild traumatic brain injuries

David Taylor, Shari Wynd

Development of student scholarship skills

Gene Tobias, Paul Wanless, David Sikorski, Anupama Kizhakkeveetil

An institutional case study of best practices for student evaluations

Michael Tunning, Dustin Derby

Chiropractic management of chronic neck pain in a cancer patient in remission: a case study

Robert Walsh, Jessica Young, Greg Snow

Symptomatology compression rates of chiropractic patients over 4 weeks with acute low back pain

John Ward, Ken Tyer

Aromatherapy for test anxiety in chiropractic students: a controlled feasibility trial

Breanne Wells, Lia Nightingale, Dustin Derby, Stacie Salisbury, Dana Lawrence

Interdisciplinary collaboration to establish a self-management course at a VA facility, for patients with chronic pain

Susan Wenberg, Sheila Sedig

Workshop	Workshop	Workshop	Workshop	Workshop
FACULTY	EDUCATION	FACULTY	CLINICAL	LEADERSHIP
<p>Toward the Development of a Standardized Chiropractic Technique Program</p> <p>Chiropractic is one of the least standardized of all professions, and this lack of standardization may frustrate the development of a unified position statement that clearly defines its cultural authority. The tremendous degree of variability between chiropractors is a reflection of the variety of different educational models available to students, especially within chiropractic technique programs. In 2014, we laid the ideological foundation upon which a profession-wide chiropractic technique program ought to be constructed. In 2016, an inventory of diagnostic procedures was created. This process unveiled a few areas of discrepancy, specifically with regards to the use of thermography/surface EMG and x-ray line marking analysis. The purpose of a 2018 Workshop is to address these areas of discrepancy in diagnostic procedures and to developing an inventory of what therapeutics procedures ought to be taught within chiropractic technique programs, based on the best available evidence consisting of published studies of clinical effectiveness and safety, patient preference and clinical experience.</p> <p><i>Brian Gleberzon Christopher Roecker Charles Blum Christopher Good Robert Cooperstein</i></p>	<p>Flipping Clinic Orientation to Decrease Remediation and Increase Performance</p> <p>Transitioning Doctor of Chiropractic students from didactic to clinical practice is one of the most challenging aspects of a chiropractic curriculum. Students must become familiar with new policies and procedures, orient to new educational expectations, and begin to integrate information from academic courses into a clinical setting. In this workshop, attendees will reflect on the effectiveness of their institution's initiatives, explore novel and assessed strategies implemented for improving this transition, and develop an action plan for enhancement to facilitate students' shift from classroom to clinic.</p> <p><i>Steven Paterno William Watson Jay Randazzo Doug Sanford</i></p>	<p>The Force Within You: Using Force-Time Profiles in Chiropractic Education</p> <p>This workshop is meant to collaborate, inspire conversation, and showcase how several chiropractic institutions have implemented force-time profiling technology into traditional technique curriculum including establishing targets and profiles, utilizing it as a form of assessment, integrating it into technique classes, and providing open lab practice opportunities.</p> <p><i>Dana Hollandsworth Eric Russell Steven Lester Paul Osterbauer Jon Wilson</i></p>	<p>Fostering Responsible Use of Social Media in Chiropractic Clinical Practice</p> <p>The purpose of this workshop is to increase the knowledge and skills of the participants in utilizing a primary social media engagement tool, specifically Facebook, for their campus clinics. This workshop will enhance participants' ability to teach future chiropractic graduates how to responsibly and effectively manage this unstoppable cultural force and to ethically enhance patient education, community engagement and brand awareness.</p> <p><i>Julie Johnson John Stites</i></p>	<p>Overcoming Your Immunity to Becoming a Better Leader</p> <p>Whether as leaders in our personal lives or as supervisors, directors, deans, VPs, or presidents, we all have behaviors that resist change. No matter what we do, we eventually find ourselves back at square one. Whatever change efforts we made might have been successful for a period of time, but then...back to square one. Some people, for example, can cut some calories, drop 10 pounds, and never look back. For many, however, that technical solution leads to a temporary weight loss. Generally, within 2 years we find ourselves having gained the weight back...plus more. The Immunity To Change process is designed to create an "X-ray", if you would, of how your goal is undermined BY YOU! Whether your goal is time management, expressing empathy, delivering difficult feedback to others, asserting yourself, asking for feedback about your performance, etc. this workshop will show you how to create an X-ray (Immunity Map) that will provide you with information that you have likely never recognized as being bound up with your goal.</p> <p><i>Tom Milus</i></p>

RESEARCH	EDUCATION	LEADERSHIP	CLINICAL	COLLABORATION
<p>Building Chiropractic Research Capacity: 2018 Research Agenda Update</p> <p>Research capacity building is necessary to support a scientific research for the chiropractic profession; however, we must first address the essential components of building research capacity. This interactive workshop will be presented by a collaborative team of experts and will encourage attendee participation. This session continues the Chiropractic Research Agenda cycle, will provide an update on the current research, and discuss building the research capacity of the chiropractic profession.</p> <p><i>Claire Johnson Bill Meeker Ian Coulter Lanay Mudd Partap Singh Khalsa</i></p>	<p>Low Tech Strategies to Enhance Spinal Manipulation Performance</p> <p>The chiropractic profession is moving toward innovative simulation methods and other technologies to enhance mastery of spinal manipulation performance. However, there are several very effective low-tech strategies that our profession has used for years. This workshop is meant to collaborate and showcase unique and novel exercises/drills that experienced technique instructors have been using at various chiropractic institutions to help students enhance palpation skills, develop speed and control of their force using in high-velocity.</p> <p><i>Steven Lester Christopher Good Dana Hollandsworth Steven Grande Paul Osterbauer</i></p>	<p>Professional Identity Formation: Values of Professionalism</p> <p>This hands-on workshop features activity regarding faculty influences on the chiropractic learner's acquisition of their professional identity. In particular, attendees will rate the current state of the educational focus in CCE accredited colleges and contrast this with the evidence on how to discern barriers in facilitating professionalism values.</p> <p><i>Stuart Kinsinger Brian McAulay</i></p>	<p>Translating Research into Practice: the ABCs of CPGs</p> <p>Clinical practice guidelines (CPGs) are one of the chief tools for improving clinical practice, forging interprofessional collaborations, and protecting patients' access to appropriate care. Doctors of chiropractic (DCs) must learn how to use CPGs skillfully in the best interests of their patients. This workshop will focus on the basic skills needed to translate research—as represented in CPGs—into everyday practice to support their patient management plans. Using an interactive small group format based on clinical scenarios, participants will work through the process of finding an appropriate CPG, critically evaluating how it supports their proposed management plan, and defending their plan in a mock utilization review.</p> <p><i>Cheryl Hawk Amy Minkalis Michael Sheppard</i></p>	<p>Establishing Core Public Health Competencies in Doctor of Chiropractic Programs</p> <p>The purpose of this workshop is to gather input and reach consensus on a core set of public health competencies to be achieved in Doctor of Chiropractic Programs (DCP). Anecdotally, there is little consistency in public health curriculum across DCPs, and a lack of consensus around the breadth and depth of public health knowledge that is appropriate for the chiropractic profession. In light of the public health burden of musculoskeletal conditions, and an ageing society suffering from chronic disease, chiropractic has an emerging opportunity to engage more broadly in public health initiatives. Workshop content builds on competencies and curricular recommendations from a range of healthcare disciplines, and is in collaboration with the American Public Health Association's Chiropractic Health Care Section.</p> <p><i>Dana Madigan Michele Maiers Joseph Pfeifer</i></p>

3:00 pm - 3:30 pm – Crystal Ballroom Foyer

Break - Sponsored by NCMIC Insurance Company

3:30 pm - 5:00 pm – Crystal Ballroom I - V

Closing Plenary

What Is the Choosing Wisely Campaign and Why Is It Important to Patients?

The purpose of the Choosing Wisely campaign is to spark thoughtful conversations between patients and their doctors about the best, most appropriate care. Choosing Wisely is a joint effort between the American Board of Internal Medicine Foundation and Consumer Reports.

They feature recommendations about health care procedures that are common, but whose usefulness in some cases is not supported by the evidence. To participate, healthcare organizations develop a list of 5 tests and/or procedures that may be common but for whom **routine use** is not necessarily based on the best evidence available. In August of 2017, the American Chiropractic Association (ACA) released their Choosing Wisely list. This list focuses on the use of x-rays, back braces, physical therapy modalities and psychosocial assessments for patients who need longer term care.

Since the release of this list, there has been significant controversy regarding the ACA's Choosing Wisely recommendations, including misunderstandings regarding how they are to be applied in chiropractic clinical practice. The ACA's Choosing Wisely campaign creates an opportunity for our chiropractic educational institutions to discuss best practices in spine care, and what constitutes patient centered, evidence informed management of back pain.

Panelists will begin with a discussion of the Choosing Wisely campaign, and the evidence base that informed recommendations. Leading experts will supplement the discussion by challenging and exploring various facets of the recommendations. This includes imaging related questions to consider as part of our chiropractic research agenda, an update of best practices for active care in patient treatment plans, and perspectives on the extent to which Doctor of Chiropractic Programs should reflect Choosing Wisely recommendations in their curricula. The goal of this session is to empower attendees with the information and tools necessary to deliver, and instruct chiropractic students in best practice management of low back pain.

Moderator: Michele Maiers, DC, PHD, Executive Director of Research and Innovation, Northwestern University of Health Sciences

Panelist: Christine Goertz, DC, PHD, Senior Scientific Advisor, American Chiropractic Association

Panelist: Todd Knudsen, DC, DACBR, Vice President of Institutional Advancement and Special Projects, New York Chiropractic College

Panelist: Andre Bussieres, DC, PHD, Assistant Professor, School of Physical and Occupational Therapy and Associate Member, Department of Epidemiology, Biostatistics and Occupational Health, McGill University; Professor, Chiropractic department, Universite du Quebec a Trois Rivieres

5:00 pm - 5:15 pm – Crystal Ballroom I - V
